

QBEsync for QuickBooks Online and Desktop
Peppol-Ready · ASP Integrated · UAE E-Invoicing Compliant

No External ASP Subscription Required — Perfonec Handles Everything

QuickBooks Desktop 2017 to 2024 · QuickBooks Online · Authorised Dealer and Pro Advisor,
Dubai UAE

THE MOST IMPORTANT DIFFERENCE — NO SEPARATE ASP SUBSCRIPTION NEEDED

QBEsync is Perfonec's own UAE e-invoicing add-on for QuickBooks. You do NOT need to find, subscribe to, or manage an external ASP separately. Perfonec handles the complete ASP integration as part of the QBEsync service — from ASP selection and appointment to API configuration, pilot testing, and go-live support. One partner. One product. Complete UAE e-invoicing compliance for QuickBooks.

1. QuickBooks Versions Compatible with QBEsync

QBEsync is compatible with every major QuickBooks version used by UAE businesses — from QuickBooks Desktop 2017 all the way through to the latest 2024 version, and with QuickBooks Online. No version upgrade is required if you are already on QuickBooks Desktop 2017 or later.

QuickBooks Version	QBEsync?	Notes
QuickBooks Desktop 2017	■ Compatible	Earliest supported version — no upgrade needed
QuickBooks Desktop 2018	■ Compatible	Full QBEsync compatibility
QuickBooks Desktop 2019	■ Compatible	Full QBEsync compatibility
QuickBooks Desktop 2020	■ Compatible	Full QBEsync compatibility
QuickBooks Desktop 2021	■ Compatible	Full QBEsync compatibility
QuickBooks Desktop 2022	■ Compatible	Full QBEsync compatibility
QuickBooks Desktop 2023	■ Compatible	Full QBEsync compatibility
QuickBooks Desktop 2024	■ Compatible	Latest Desktop version — full support
QuickBooks Online	■ Compatible	API integration — works from any browser or device

2. What Perfonec Handles — No External ASP Subscription Required

PERFONEC HANDLES EVERYTHING

Most UAE e-invoicing solutions require you to independently find an ASP, subscribe to it, complete their onboarding, manage their credentials, and maintain the connection separately from your accounting software. QBEsync by Perfonec is different. Perfonec handles the complete ASP layer as part of the QBEsync service — you deal only with Perfonec. Everything else is managed for you.

What Most Solutions Require from You	What Perfonec Handles for You with QBEsync
Find and evaluate 33 FTA-approved ASPs yourself	■ Perfonec selects the right ASP for your QuickBooks version and invoice volume

What Most Solutions Require from You	What Perfonec Handles for You with QBESync
Submit ASP appointment paperwork independently	■ Perfonec manages the ASP appointment process end to end
Subscribe to ASP — monthly recurring cost	■ Perfonec handles ASP — no separate external subscription for you to manage
Complete ASP API onboarding to get credentials	■ Perfonec obtains and configures all ASP API credentials in QBESync
Configure ASP API in your software yourself	■ Perfonec configures QBESync with ASP API — client ID, secret, endpoint URL
Test ASP connection and resolve errors yourself	■ Perfonec tests and verifies full ASP connection before pilot phase begins
Manage ASP vendor relationship ongoing	■ Perfonec manages ASP relationship — you contact only Perfonec for all support
Monitor ASP compliance updates independently	■ Perfonec monitors UAE e-invoicing updates and keeps QBESync compliant

3. How QBESync Works — Peppol-Ready, ASP Integrated

Once Perfonec installs and configures QBESync on your QuickBooks, the complete UAE e-invoicing process is automatic. Your accounting team does nothing differently.

Step	What Happens	Who Does It
1	Create and confirm B2B invoice in QuickBooks Desktop or Online — exactly as always	Your team — no change
2	QBSync extracts invoice data and generates PINT AE XML with all 17 mandatory fields	■ QBESync automatic
3	QBSync validates all 17 PINT AE mandatory fields before ASP transmission	■ QBESync automatic
4	QBSync sends validated PINT AE XML to Perfonec's integrated ASP via secure API	■ QBESync automatic
5	ASP validates and transmits invoice through UAE Peppol network to buyer	■ ASP via Perfonec
6	Peppol network delivers invoice to buyer's accounting system or ASP	■ Peppol network
7	Transmission status — sent, received, or rejected — visible in QBESync dashboard	■ QBESync dashboard

4. QBESync Full Feature List

- Peppol-Ready — QBESync transmits directly through the UAE Peppol network via Perfonec's integrated ASP
- ASP Integrated — no external ASP subscription, no separate ASP management, Perfonec handles all
- QuickBooks Desktop 2017 to 2024 — all Desktop versions from 2017 through 2024 supported
- QuickBooks Online — full API integration for cloud-based QuickBooks Online users
- PINT AE XML generation — converts QuickBooks invoice data to UAE PINT AE XML automatically
- 17 mandatory field validation — all PINT AE fields validated before transmission, errors caught first
- Real-time transmission status — sent, received, rejected visible per invoice in QBESync dashboard
- Credit note support — QuickBooks credit notes mapped to PINT AE invoice type 381 automatically
- Advance payment support — advance invoices issued at time of receipt per Version 1.1
- Multi-currency support — AED domestic and foreign currency with AED equivalent amounts for PINT AE
- UAE VAT category mapping — S (standard 5%), Z (zero-rated), E (exempt), O (out of scope)
- Version 1.1 compliant — advance payment at receipt, retention split, free zone beneficiary field
- Zero workflow change — team uses QuickBooks exactly as before after Perfonec one-time setup

- Always up to date — Perfonec monitors UAE e-invoicing updates and keeps QBESync compliant
- Developer = support partner — same team that built QBESync supports it at product level

5. QuickBooks Desktop vs QuickBooks Online — Which Is Right for Your UAE Business?

Both are fully UAE e-invoicing compliant with QBESync. The choice depends on your business size, team structure, and operational needs — not on e-invoicing capability. QBESync covers both equally.

Factor	QuickBooks Desktop 2017–2024	QuickBooks Online
QBEsync compatible	■ Yes — all versions 2017–2024	■ Yes — via API
PINT AE XML	■ Auto on invoice confirm	■ Auto via API
ASP subscription	■ Perfonec handles — none needed	■ Perfonec handles — none needed
Access	Office-based / server	■ Cloud — anywhere
Multi-user	Limited / Enterprise up to 40	■ Unlimited users
Invoice volume	Mid to high volume	SME to mid volume
Offline capability	■ Yes — works without internet	Requires internet
