

Is QuickBooks Online UAE E-Invoicing Ready in 2027?

Yes — With QBESync by Perfonec Computers

QuickBooks Online | QuickBooks Desktop | QuickBooks Enterprise — All Covered

Peppol-Ready. ASP Integrated. Smarter Accounting. Stronger Business.

THE ANSWER — YES, ALL QUICKBOOKS VERSIONS ARE COVERED

YES. QuickBooks Online, QuickBooks Desktop, and QuickBooks Enterprise are all UAE e-invoicing ready from 2027 — with QBESync by Perfonec Computers. QBESync connects any QuickBooks version to an FTA-approved ASP for PINT AE XML transmission through the UAE Peppol network. No software replacement. No workflow change. One platform. Complete business control. Built for UAE businesses.

1. Does QuickBooks Online Support UAE E-Invoicing Natively?

QuickBooks Online does not generate PINT AE XML or connect to the UAE Peppol network natively. This is not a QuickBooks limitation — it is simply because UAE e-invoicing is a market-specific requirement that Intuit's global platform has not built natively for the UAE. QBESync by Perfonec fills this gap — connecting QuickBooks Online to an FTA-approved ASP for PINT AE XML generation and Peppol transmission, without changing anything about how your team uses QuickBooks Online.

QuickBooks Version	UAE E-Invoicing?	How QBESync Makes It Compliant
QuickBooks Online	■ With QBESync	QBESync connects QB Online to ASP via API. PINT AE XML auto-generated on invoice confirmation.
QuickBooks Desktop Premier	■ With QBESync	QBESync installed alongside QB Desktop. PINT AE XML and ASP transmission fully automated.
QuickBooks Desktop Enterprise	■ With QBESync	Full QBESync compatibility with Enterprise. Handles high-volume B2B invoice transmission.
QuickBooks Desktop Pro	■ With QBESync	QBESync works with QB Pro. All PINT AE fields mapped and ASP connected automatically.

2. What QBESync Does for QuickBooks Online Users

QBESync is Perfonec's UAE e-invoicing add-on developed specifically for QuickBooks — Online, Desktop, and Enterprise. It runs alongside your existing QuickBooks and handles all UAE e-invoicing compliance automatically. Your accounting team continues using QuickBooks Online exactly as before.

Peppol-Ready. ASP Integrated.

QBESync connects your QuickBooks Online to an FTA-approved ASP and the UAE Peppol network. When you confirm a B2B invoice in QuickBooks Online, QBESync automatically generates PINT AE XML and transmits it through your ASP to the buyer via Peppol.

Advanced Inventory Control

QBESync works alongside QuickBooks Online's inventory module — all inventory-based invoices are correctly mapped to PINT AE line item format with UN/CEFACT unit codes, quantities, and unit prices in the correct PINT AE XML structure.

Real-Time Financial Reporting

Invoice transmission status is visible in the QBESync dashboard alongside your QuickBooks Online — sent, received, or rejected per invoice with full error detail for any rejected invoices.

Access Data from Anywhere

QuickBooks Online is cloud-based — and QBESync integrates with the QuickBooks Online API, meaning e-invoicing compliance works wherever your team accesses QuickBooks Online, whether in the office, at home, or on the road.

Reliable. Secure. Always Up to Date.

QBEsync is maintained and updated by Perfonec as the Authorised QuickBooks Dealer and Certified Pro Advisor in Dubai. As UAE e-invoicing guidelines update, QBESync updates accordingly — your compliance is always current.

3. QuickBooks Online vs Desktop vs Enterprise — E-Invoicing Comparison
